Benjamin Power Metered Panelboard

with Remote Controllable Circuit Breakers

Introducing a way to see inside your electrical system to make your growing systems more efficient and improve your overall growing quality.

- Provides round-the-clock monitoring of your vital loads and lets you know when there are problems to be addressed. Minimizes disruptions to all growing cycles.
- Provides lighting and power controls that are tailored to your operations.
- Power Metered Panelboards are a component within the Compass Enterprise platform which provides comprehensive growing facilities control.
- Panelboards are field-retrofitable into existing installations to gain these powerful features for your entire growing facility.
